Doan Van Vinh

Fullstack Developer

Dob: 07/12/2000
Gender: Male
Phone: 0834696983
Email: doanvinh983@gmail.com
Website: www.linkedin.com/in/đoàn-văn-vĩnh-459952278
Address: Tan Binh district, Ho Chi Minh city, Vietnam

OBJECTIVE

A product-minded **Fullstack Developer** with over 4 years of experience building high-performance Web and Mobile applications. Leveraging a sharp expertise in modern Frontend development combined with a solid foundation in Backend architectures (NestJS, Java Spring Boot, Python Flask) and databases (PostgreSQL, MySQL). I am seeking a role where I can take end-to-end ownership of features—from responsive client interfaces to scalable APIs—to deliver robust, production-ready systems.

TECHNICAL SKILLS

Web Development	Next.js, React.js, UmiJS, .NET Blazor.
BE Development	NestJS, .Net, Java Spring Boot, Flask.
Mobile Development	Flutter, React Native, Android Native.
Programming Languages	Javascript/TypeScript, Dart, Java, Python, C#.
State Manegement	Redux, Zustand, Provider, BloC.
Architecture&Tools	Clean Architecture, MVVM, Git/GitHub, CI/CD pipelines.
AI Integration	Cursor, Claude Code, Antigravity, Codex.

WORK EXPERIENCE

May 2025 - Now

LIA BEAUTY JSC
Fullstack Developer/Mobile Developer

- Develop Admin Web settings, manage data configurations for Mobile Apps/Landing Pages, and implement core backend **CRUD APIs** using **NestJS**.
- Write and optimize database queries on **PostgreSQL** to handle application data efficiently.
- Integrate RESTful APIs, Firebase, Payment Gateways, and Third-Party Call services seamlessly across frontend and backend layers.
- Collaborate with cross-functional teams, delegate tasks, and conduct comprehensive code reviews.
- Utilize AI tools (Cursor, Figma MCP) to optimize the end-to-end development process and accelerate feature delivery.

March 2022 - May 2025

Digitech Solutions
Fullstack Developer/Mobile Developer

- Developed high-performance mobile apps using **Flutter**, **React Native**, and Android Native, while building web interfaces with **UmiJS**, **React.js**, **Next.js**, and **.NET Blazor**.
- Built and maintained robust backend services and core CRUD APIs utilizing **NestJS** and **.NET** frameworks.
- Developed microservices using **Python Flask** to create dedicated chatbot APIs, connecting seamlessly with the core backend ecosystem.
- Acted as a **Data Analyst (DA)**, leveraging **Python** to process, clean, and structure datasets for training AI models.
- Applied modern architectural patterns including Clean Architecture and MVVM, and integrated QR Code scanning and Firebase functionalities.

- Mentored new team members and analyzed technical requirements to propose effective end-to-end solutions.

Dec 2021 - March 2022

Digitech Solutions
Mobile Intern

- Developed an eCommerce mobile application using Flutter.
- Collaborated with senior developers to optimize performance and resolve technical issues.

KEY PROJECTS

May 2025 - Now

LIA Beauty Operations & Booking Platform
Fullstack Developer
Team size: 6
Frontend Technology: ReactJS, NextJS, React Native Expo.
Backend Technology: NestJS, Postgresql.
Description: An end-to-end management and booking platform for beauty salons, integrated with AI-driven capabilities.

- **Primary Focus:** Led the core development of both **Business and Customer mobile applications** featuring rich functionalities using **React Native Expo**.
- Built responsive **Landing Pages** integrated with **real-time AI Face Detection** using **Next.js**, alongside a comprehensive **Web CMS** for data configuration.
- Developed robust backend **CRUD and operational APIs** using **NestJS** to power other system core features.
- Took full responsibility for publishing, managing, and maintaining the production apps on both **App Store and Google Play**.

Oct 2024 - Jun 2025

Gas Station Management System
Mobile Developer
Frontend Technology: Flutter.
Description: An enterprise gas station management system designed to streamline fueling operations, fuel monitoring, and financial tracking.

- Developed the mobile application using **Flutter**, implementing **Clean Architecture** and **BLoC** pattern for robust state management and code scalability.
- Integrated RESTful APIs to deliver core modules: **Station & staff management, fuel tank monitoring, supplier directories, and debt/financial tracking**.
- Implemented **Firebase Cloud Messaging (FCM)** to enable real-time push notifications for system updates and transaction alerts.
- Collaborated closely with backend developers to design secure and efficient data integration workflows for financial transactions.

July 2024 - May 2025

Feng Shui Mobile Application
Mobile Developer
Team size: 6
Frontend Technology: ReactJS, NextJS, React Native.
Backend Technology: NestJS, Postgresql.
Description:A mobile application for Feng Shui and horoscope lookup, helping users track destiny insights and optimize orientation elements.

- Led the mobile development using **React Native**, crafting intuitive UI/UX and ensuring smooth cross-platform performance.
- Utilized device **compass sensors** to implement accurate Feng Shui direction and alignment tracking.
- Developed core personalized features, including Feng Shui lookup, **daily horoscope (destiny tracking)**, and fortune predictions.
- Integrated backend RESTful APIs smoothly with the **NestJS** and **PostgreSQL** layer for reliable data synchronization.
- Took full responsibility for publishing, managing, and maintaining the production apps on both **App Store and Google Play**.

May 2023 - Jun 2024

Beauty Salon Operations & Booking Platform
Fullstack Developer

Team size: 8
Frontend Technology: ReactJS, NextJS, React Native, Python.
Backend Technology: NestJS, Postgresql.
AI Technology: YoloV8, OpenCV, Google Mediapipe.
Description: An end-to-end management and booking platform for beauty salons, integrated with AI-driven capabilities.

- **Primary Focus:** Led the core development of both **Business and Customer mobile applications** featuring rich functionalities using **React Native**.
- Built responsive **Landing Pages** integrated with **real-time AI Face Detection** using **Next.js**, alongside a comprehensive **Web CMS** for data configuration.
- Engaged in the full AI lifecycle: data preparation, **model training**, and developing dedicated image processing APIs to handle and return analytical results.
- Developed robust backend **CRUD and operational APIs** using **NestJS** to power other system core features.
- Took full responsibility for publishing, managing, and maintaining the production apps on both **App Store and Google Play**.

Dec 2022 - May 2023

BK Golf Member
Mobile Developer
Team size: 4
Frontend Technology: Flutter.
Backend Technology: NestJS, Postgresql.
Description: A membership and event management platform for a golf club.

- Acted as the **Sole Developer** to build the entire mobile application using **Flutter**.
- Implemented **membership management** and **QR Code check-in** functionalities.
- Developed core modules for **event creation** and seamless member registration.
- Integrated RESTful APIs smoothly with the **NestJS** backend and **PostgreSQL** database.
- Took full responsibility for publishing, managing, and maintaining the production apps on both **App Store and Google Play**.

Dec 2021 - Oct 2022

Project RDOS Tân Hiệp Phát
Frontend Development
Team size: 10
Frontend Technology: Blazor, HTML, CSS, SCSS, javascript, Flutter.
Backend Technology: Dot Net, Postgresql.
Description: A Retail Distributor Operation System (RDOS) developed for Tan Hiep Phat Group to digitize distribution networks and manage sales operations.

- Developed core enterprise modules across Web (**Blazor**) and Mobile (**Flutter**): **Inventory Management, Sales Route, Attendance Tracking, and Sales Order**.
- Implemented **Clean Architecture** and **BLoC** pattern on the mobile app to ensure standard code scalability and robust state management.
- Built an **advanced Attendance module** featuring GPS geolocating, **Google Maps** rendering, and photo-capturing embedded with metadata.
- Engineered an **offline-first data synchronization** mechanism to automatically sync attendance and order logs once internet connectivity reconnects.
- Handled complex client-side logic and ensured seamless transactional integration with the **.NET** backend and **PostgreSQL** database.

EDUCATION

August 2018 - April 2023

Industrial University in Ho Chi Minh city (IUH)
Software Engineer
GPA: 2.9/4

FOREIGN LANGUAGE

English:

- Basic reading & technical documentation comprehension.

- Able to communicate in simple technical discussions.

ACTIVITIES

January 2022 - March 2022	**The 4th Young Scientists Conference – 2022 at Industrial University in Ho Chi Minh city** **Member** Contributed to the development of a restaurant management solution and authored a detailed report on its implementation.

INTERESTS

- Exploring new front-end & mobile technologies, optimizing user experience Researching AI applications and automating development processes.
- Playing guitar, listening to music.
- Traveling and discovering new places.
- Gaming and playing football.
