

Doan Van Vinh

Fullstack Developer

Dob: 07/12/2000

Gender: Male

Phone: 0834696983

Email: doanvinh983@gmail.com

Website: www.linkedin.com/in/đoàn-văn-vĩnh-459952278

Address: Tan Binh district, Ho Chi Minh city, Vietnam

OBJECTIVE

Software Engineer with 5 years of experience building web and mobile applications, with strong expertise in frontend and mobile development. Skilled in React.js, Next.js, Blazor, UmiJS, Flutter, React Native, and Android Native, with additional experience in backend technologies such as NestJS, Java Spring Boot, and Python Flask, as well as relational databases including PostgreSQL, MySQL, and MSSQL. Capable of contributing across Frontend, Mobile, and Fullstack roles by delivering responsive interfaces, scalable application features, and production-ready systems.

TECHNICAL SKILLS

Web Development	Next.js, React.js, UmiJS, .NET Blazor.
BE Development	NestJS, .Net, Java Spring Boot, Flask.
Mobile Development	Flutter, React Native, Android Native.
Programming Languages	Javascript/TypeScript, Dart, Java, Python, C#.
State Manegement	Redux, Zustand, Provider, BloC.
Architecture&Tools	Clean Architecture, MVVM, Git/GitHub, CI/CD pipelines.
AI Integration	Cursor, Claude Code, Antigravity, Codex.

WORK EXPERIENCE

May 2025 - Now	LIA BEAUTY JSC Fullstack Developer/Mobile Developer - Develop Admin Web settings, manage data configurations for Mobile Apps/Landing Pages, and implement core backend CRUD APIs using NestJS. - Write and optimize database queries on PostgreSQL to handle application data efficiently. - Integrate RESTful APIs, Firebase, Payment Gateways, and Third-Party Call services seamlessly across frontend and backend layers. - Collaborate with cross-functional teams, delegate tasks, and conduct comprehensive code reviews. - Utilize AI tools (Cursor, Figma MCP) to optimize the end-to-end development process and accelerate feature delivery.
Jul 2021 - May 2025	Digitech Solutions Fullstack Developer/Mobile Developer - Developed high-performance mobile apps using Flutter, React Native, and Android Native, while building web interfaces with UmiJS, React.js, Next.js, and .NET Blazor. - Built and maintained robust backend services and core CRUD APIs utilizing NestJS and .NET frameworks. - Developed microservices using Python Flask to create dedicated chatbot APIs, connecting seamlessly with the core backend ecosystem. - Acted as a Data Analyst (DA), leveraging Python to process, clean, and structure datasets for training AI models.

Apr 2021 - Jul 2021	- Applied modern architectural patterns including Clean Architecture and MVVM, and integrated QR Code scanning and Firebase functionalities. - Mentored new team members and analyzed technical requirements to propose effective end-to-end solutions.
	Digitech Solutions Mobile Intern - Developed an eCommerce mobile application using Flutter. - Collaborated with senior developers to optimize performance and resolve technical issues.

KEY PROJECTS

May 2025 - Now	LIA Beauty Operations & Booking Platform Fullstack Developer Team size: 6 Frontend Technology: ReactJS, NextJS, React Native Expo. Backend Technology: NestJS, Postgresql. Description: An end-to-end management and booking platform for beauty salons, integrated with AI-driven capabilities. Primary Focus: Led the core development of both Business and Customer mobile applications featuring rich functionalities using React Native Expo. - Built responsive Landing Pages integrated with real-time AI Face Detection using Next.js, alongside a comprehensive Web CMS for data configuration. - Developed robust backend CRUD and operational APIs using NestJS to power other system core features. - Took full responsibility for publishing, managing, and maintaining the production apps on both App Store and Google Play.
Oct 2024 - Jun 2025	Gas Station Management System Mobile Developer Frontend Technology: Flutter. Description: An enterprise gas station management system designed to streamline fueling operations, fuel monitoring, and financial tracking. - Developed the mobile application using Flutter, implementing Clean Architecture and BLoC pattern for robust state management and code scalability. - Integrated RESTful APIs to deliver core modules: Station & staff management, fuel tank monitoring, supplier directories, and debt/financial tracking. - Implemented Firebase Cloud Messaging (FCM) to enable real-time push notifications for system updates and transaction alerts. - Collaborated closely with backend developers to design secure and efficient data integration workflows for financial transactions.
Jan 2023 - Dec 2024	DigiTouch Application Mobile Developer Frontend Technology: Flutter. Description: Contributed to the development of DigiTouch , a digital business card application that enables users to share contact information via QR codes, manage connections, and communicate through in-app messaging. - Designed and established the Flutter project architecture based on the MVVM pattern, ensuring a scalable and maintainable codebase. - Developed core application features using Flutter and managed state efficiently with Provider. - Integrated Firebase services, including Authentication for user management and Firebase Cloud Messaging (FCM) for push notifications. - Implemented QR code scanning to support digital card sharing and friend connection workflows. - Developed and maintained chat functionality to enhance user interaction within the app. - Worked closely with the team to deliver a stable, responsive, and user-friendly mobile application.
Jan 2023 - Dec 2024	Ecommerce Application Mobile Developer

Description: Developed a mobile e-commerce application using **Flutter**, focusing on core shopping features, scalable architecture, and performance optimization.

- Applied **Clean Architecture** to design a maintainable and scalable mobile codebase.
- Used **BLoC** for state management and business logic handling.
- Developed core e-commerce features, including **product listing**, **product detail**, and related shopping flows.
- Integrated **Firebase Authentication** and **Firebase Cloud Messaging (FCM)**.
- Implemented UI handling for **offline** and **network failure** scenarios to improve user experience during connectivity issues.
- Optimized UI rendering and application performance to reduce loading time and deliver a smoother mobile experience.

July 2024 - May 2025	Feng Shui Mobile Application Mobile Developer Team size: 6 Frontend Technology: ReactJS, NextJS, React Native. Backend Technology: NestJS, Postgresql. Description:A mobile application for Feng Shui and horoscope lookup, helping users track destiny insights and optimize orientation elements. • Led the mobile development using React Native, crafting intuitive UI/UX and ensuring smooth cross-platform performance. • Utilized device compass sensors to implement accurate Feng Shui direction and alignment tracking. • Developed core personalized features, including Feng Shui lookup, daily horoscope (destiny tracking), and fortune predictions. • Integrated backend RESTful APIs smoothly with the NestJS and PostgreSQL layer for reliable data synchronization. • Took full responsibility for publishing, managing, and maintaining the production apps on both App Store and Google Play.
----------------------	--

May 2023 - Jun 2024	Beauty Salon Operations & Booking Platform Fullstack Developer Team size: 8 Frontend Technology: ReactJS, NextJS, React Native, Python. Backend Technology: NestJS, Postgresql. AI Technology: YoloV8, OpenCV, Google Mediapipe. Description: An end-to-end management and booking platform for beauty salons, integrated with AI-driven capabilities. • Primary Focus: Led the core development of both Business and Customer mobile applications featuring rich functionalities using React Native. • Built responsive Landing Pages integrated with real-time AI Face Detection using Next.js, alongside a comprehensive Web CMS for data configuration. • Engaged in the full AI lifecycle: data preparation, model training, and developing dedicated image processing APIs to handle and return analytical results. • Developed robust backend CRUD and operational APIs using NestJS to power other system core features. • Took full responsibility for publishing, managing, and maintaining the production apps on both App Store and Google Play.
---------------------	--

Dec 2022 - May 2023	BK Golf Member Mobile Developer Team size: 4 Frontend Technology: Flutter. Backend Technology: NestJS, Postgresql. Description: A membership and event management platform for a golf club. • Acted as the Sole Developer to build the entire mobile application using Flutter. • Implemented membership management and QR Code check-in functionalities. • Developed core modules for event creation and seamless member registration. • Integrated RESTful APIs smoothly with the NestJS backend and PostgreSQL database.
---------------------	--

- Took full responsibility for publishing, managing, and maintaining the production apps on both **App Store** and **Google Play**.

Dec 2021 - Oct 2022

Project RDOS Tân Hiệp Phát

Frontend Development

Team size: 10

Frontend Technology: Blazor, HTML, CSS, SCSS, javascript, Flutter.

Backend Technology: Dot Net, Postgresql.

Description: A Retail Distributor Operation System (RDOS) developed for Tan Hiep Phat Group to digitize distribution networks and manage sales operations.

- Developed core enterprise modules across Web (**Blazor**) and Mobile (**Flutter**): **Inventory Management, Sales Route, Attendance Tracking, and Sales Order**.
- Implemented **Clean Architecture** and **BLoC** pattern on the mobile app to ensure standard code scalability and robust state management.
- Built an **advanced Attendance module** featuring GPS geolocating, **Google Maps** rendering, and photo-capturing embedded with metadata.
- Engineered an **offline-first data synchronization** mechanism to automatically sync attendance and order logs once internet connectivity reconnects.
- Handled complex client-side logic and ensured seamless transactional integration with the **.NET** backend and **PostgreSQL** database.

EDUCATION

August 2018 - April 2023

Industrial University in Ho Chi Minh city (IUH)

Software Engineer

GPA: 2.9/4

FOREIGN LANGUAGE

English:

- Basic reading & technical documentation comprehension.
- Able to communicate in simple technical discussions.

ACTIVITIES

January 2022 - March 2022

The 4th Young Scientists Conference – 2022 at Industrial University in Ho Chi Minh city Member

Contributed to the development of a restaurant management solution and authored a detailed report on its implementation.

INTERESTS

- Exploring new front-end & mobile technologies, optimizing user experience Researching AI applications and automating development processes.
- Playing guitar, listening to music.
- Traveling and discovering new places.
- Gaming and playing football.
